Adolescent girls, Adolescent boys,  
Late adolescent boys, Family, School,  
Social, Health, Personal problems

## ABSTRACT

Problems experienced by early adolescent boys and girls in family, school, social, health and personal areas were studied in the present research. The data was collected from 120 subjects of Udaipur city. Socio personal problems inventory was used. The data was subjected to per cent and mean per cent score analysis. The study has revealed that the extent of problems experienced by early adolescent and late adolescent girls and boys were found to be low.
