Publication of research work is really an important aspect of research and individual curriculum vitae. Research work is published in journals as review articles, original research articles, case studies, meta-analysis etc. . . Medical authors in spite of busy schedule, clinical work load are increasingly showing interest in publication works due to increased importance of research and publication of research work. Searching of right journal with good ethical and moral values is always a challenge.

International Journal of Clinical Biochemistry and Research was born in 2014 with the idea of providing quality journal with author friendly guidance in publishing ethical research work. The journal has travelled through 09 years of ethical publication. The journal has always updated the contemporary publication standards with time. The online transparent portal for submission, review and editorial scrutiny was started in this journal ahead of many contemporary journals. These processes have drawn the interest of many authors for their publication in this journal. The journal has maintained high standards all these years despite busy schedules and compelling situations like COVID. The team of this journal including back-end office staff. Reviewers, editors have maintained high amount of professionalism with constant upgrades of knowledge and

changing publication standards.

The journal is now publishing volume 10; Issue 1; for January – March 2023 edition. This issue has valuable review articles on allergen specific immunoglobulins, nano particles in food safety, medical education and management techniques. The authors also have published original research articles on many important biochemical molecules. Indices and other tools in laboratory analysis.

This issue is a biochemical treat to the readers. I congratulate all the authors for their knowledge rich research work and all the readers who have been with us in this journey of 09 years.
