From Editor's Desk.....

"Gaining Knowledge is the first step to Wisdom, sharing it is the first step to Humanity"

Dear Readers, Researchers, and Contributors,

We are delighted to introduce the most recent issue of the International Journal of Maxillofacial Imaging. The main focus of this journal is on several facets of dentistry and related topics, especially oral imaging.

Since many real-world issues are complex, I especially encourage contributions that can show immediate practical value and that adopt a multidisciplinary or convergent approach. This issue carries on our goal of showcasing innovative dental research and sustainable solutions from distinguished scholars throughout the globe.

In a variety of formats, including full-length and letter-length research papers, survey papers, work-in-progress reports on promising developments, case studies/best practice articles, and tutorials on upcoming technological breakthroughs, this journal will offer an excellent platform for the exchange of information on all of the aforementioned topics and more.

The editorial board of the journal is adamant that this program will produce peer-reviewed, science-driven publications that meet the rigorous international procedures and editorial standards that the scientific community demands. We are now releasing four times a year. We strive to finish each paper's review process as promptly as possible upon initial submission in order to guarantee quick information dissemination.

We appreciate your ongoing interest and invite you to contribute your perceptive findings for consideration in next issues. Your input will have a significant impact on how supportable platforms evolve in the future.

Warm regards,

Dr. Sowmya Gujjar VishnuRao

Editor-in-Chief: International Journal of Maxillofacial Imaging.

Professor,

Department of Oral Medicine & Radiology,

Institute of Dental Sciences, Bareilly International University,

Bareilly, Uttar Pradesh, India
